

Harijana Ashok

Tirupati | harijanaashok8061@gmail.com | +91-9908983296 | github.com | linkedin.com

Professional Summary

Passionate problem solver with 650+ coding problems solved across LeetCode, CodeChef, and HackerRank. Strong foundation in Data Structures and Algorithms using Java, with hands-on experience in building scalable full-stack and AI-powered applications. Skilled in writing optimized, clean code and debugging complex problems. Seeking to contribute strong algorithmic thinking and engineering skills in a high-impact technical role.

Education

Mohan Babu University, Bachelor of Technology Oct 2022 – Pursuing

- CGPA: 8.4
- **Coursework:** Data Structures and Algorithms, DBMS, Operating Systems, Machine Learning, Deep Learning

Competitive Programming

Solved 440+ problems on LeetCode leetcode.com

Solved 100+ problems on CodeChef codechef.com

Solved 100+ problems on HackerRank hackerrank.com

Strength: Strong command over Data Structures: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Graphs

Internships

Software Development Intern, Infosys Springboard | Remote Aug 2025 – Oct 2025

- Completed industry-aligned training in software engineering, preparing to deliver a full-scale real-time project for deployment.
- Collaborating in a virtual team environment to apply agile project workflows, sprint planning, and peer code reviews to upcoming deliverables

AI/ML Intern, AWS Academy | Remote Apr 2025 – June 2025

- Built machine learning projects using AWS services such as EC2, Lambda, and S3.
- Applied AWS Cloud and ML foundations to deliver scalable, production-ready projects in a collaborative lab setting

Projects

Agentic AI Assistant – Multi-Agent NLP Automation Tool github.com/Agentic-AI

- Designed and implemented a multi-agent system handling scheduling and task automation
- Integrated external APIs including Google Calendar
- Optimized backend workflows to reduce task execution latency
- Tools Used: Python, Flask, NLP Libraries

AI - Based Contract Language Simplifier github.com/AI-Based

- Developed NLP pipeline for simplifying complex legal documents
- Implemented document parsing and text preprocessing modules
- Tools Used: Streamlit, Custom CSS, Python, Hugging Face Transformers Library, PyMuPDF, JSON

Technologies

Programming Languages: Java (Strong), Python (Intermediate), C (Intermediate), JavaScript

Web and Backend: React, Flask, HTML5, CSS, Bootstrap

Cloud Platforms: AWS (EC2, S3, Lambda)

Core Concepts: Data Structures and Algorithms, DBMS, Operating Systems, Machine Learning, Deep Learning

Other Tools: VS Code, Google Colab, TensorFlow
